THE IVORY CRADLE SCHOOL

Feeding Support on Shift

Feeding-plan conversation guide and practice worksheet

01 Confirm the plan before you take over

ASK THE PARENT

- ☐ When the baby **last fed**
- ☐ Which **labeled bottle** to use and when
- ☐ When to **bring the baby to the parent to nurse**
- ☐ When to **wake the parent**

Read back the plan. **Ask to see any clinician-directed instructions.**

02 During the feed

[1, 2]

- Start with **clean hands and supplies**.
- **Allow pauses.**
- **Keep the bottle in your hand** throughout the feed.
- **Hold the baby close** and **hold the bottle at an angle**.
- **Stop** when the baby shows **fullness cues**.

03 Know which time limit applies

Prepared formula — FORMULA

Use within **2 hours of preparation** and **1 hour of starting the feed**.

IF NOT USED **Refrigerate promptly** if it will not be used right away and **use within 24 hours**.

LEFTOVERS **Discard** any formula left after the feed. [2]

Expressed breast milk — BREAST MILK

Use within **2 hours of warming or bringing to room temperature**.

LEFTOVERS Use leftovers **within 2 hours of the end of the feed** and within any earlier applicable storage limit. [3]

04 Work the overnight case

At **12:10 a.m.** baby takes **1 oz of 2 oz expressed milk** offered, then **turns away twice**. It was less than usual, and the parent asked to be woken. Milk warmed at **midnight**. Feed ended at **12:20 a.m.**

AT ARRIVAL What would you ask about when to nurse or use the backup bottle?

_____

_____

TO THE PARENT What would you say when you wake them?

_____

_____

IN THE LOG Record time, milk type, amounts, cue, and action.

TIME _____

MILK TYPE _____

AMOUNTS _____

CUE _____

ACTION _____

_____

MILK DEADLINE **WARMING LIMIT** _____ **LEFTOVER LIMIT** _____ **EARLIER DEADLINE** _____

Speak up early Report feeding concerns **promptly** and help the parent reach the pediatrician when needed. [4]
